

PRIYATOSH KUMAR

Full Stack Web Developer

+91 7068137960 priyatoshshahi90@gmail.com <https://www.linkedin.com/in/priyatosh-kumar>

SUMMARY

Computer Science and Engineering student with a keen interest in web development, both frontend as well as backend. HTML, CSS and JavaScript with React, Express.js and MongoDB to build interactive applications with a richer user experience. C developer & lifelong student of technology. Keen to offer creative solutions and construct successful projects.

PROJECTS

Zocial

A modern web application for social media with all the key features implemented using JavaScript technologies: MongoDB, Express.js/Node.js, and the React frontend framework; real-time messaging implemented with Socket.IO. Zocial is a platform that lets users to link up, discuss the posts, and talk live. Some of them are the modern information stream, real-time notifications and simple authentication mechanism which provide an advanced and interactive interface to the application.

Talkon

A social chat application with real-time users list and messages list implemented in the frontend using React.js and in the backend by using Node.js and Express.js with the database MongoDB and using Socket.IO to have real-time connection with the client side. Talkon allows particularly gesture or typing indications and real-time notification for one-to-one communication. Built with a user interface and secured access, it enables a lively and optimal flow of communication.

Portfolio

My personal portfolio made to highlight my skills and control of frontend development and responsive designs
