PRIYATOSH KUMAR

Web Developer

+91 7068137960   priytoshshahi@gmail.com   https://www.linkedin.com/in/priyatosh-kumar

SUMMARY

Computer Science and Engineering student with a keen interest in web development, both frontend as well as backend. HTML, CSS and JavaScript with React, Express. js and MongoDB to build interactive applications with a richer user experience. C developer & lifelong studen of technology. Keen to offer creative solutions and construct successful projects.

PROJECTS

Savings Planner

My work on a Savings Planner website based which will allow the users to track the savings on daily and date basis. It provides storage for the user to log their savings and stores it in local storage to be readily available for continual use. Integrated with Chart. Through j, the planner delivers real-time visualizations of savings data in transparent and interactive charts so that users can visualize their progress and a step closer to history-based financial decisions.

Portfolio

My personal portfolio made to highlight my skills and control of frontend development and responnsive designs

Carbon Footprint

Developed a carbon footprint tracker application which calculate carbon emmision of an individual on the various inputs like vehicle driven , electricity usage , etc. This websites includes technologies like javascript , HTML & CSS. Integration of chart.js also takes place in this website. This project is made with the thought to monitor the personal carbon emmision. of a person.
